

# Bonafide |

## Better outcomes begin with better solutions.

**Make the invisible, visible by effectively testing for and tracking infections on a single, digital dashboard.**

The Bonafide software helps mitigate the spread of infection by tracking and managing infections throughout your facility. Using its floor plan tile feature, the tool provides your facility with contamination analytics by facility, department, and room on an easy to understand dashboard. It creates a tangible and visible display of the infection's origin and advancements to help you track and eliminate further spread.

This comprehensive tool assists your facility to prevent infection outbreaks, saves patient lives, and meets and exceeds CMS and CDC guidelines while reducing financial and administrative burdens.

**Bonafide connects all of your locations:**
