

Inconvenienced by hand hygiene product and dispenser discontinuations?

Some hand hygiene manufacturers are discontinuing multiple soap / sanitizer SKUs and the dispenser platforms that support them. This will require a complete dispenser conversion. The manufacturer's remaining portfolio of products are not compatible with the discontinued dispensers.

While this forced conversion is inconvenient, it also provides an opportunity to evaluate other hand hygiene programs in order to find the best products available to improve clinical performance while achieving cost savings. Altra dispensers are backwards compatible, therefore the same refills can be used across multiple generations of dispensers. Altra is also adding new dispensers to its portfolio of offerings that will utilize the same refills.

Holistic Approach to Safeguard Your Environment. Customized Solutions to Meet Your Needs.
