

INTRODUCING RestorixHealth's New Negative Pressure Wound Therapy Solution

Powered by MasVida Health

Delivering comfortable and more effective wound care for your residents.

A Partnership that Promotes Wound Healing in Less Time

This new partnership can improve your clinical outcomes, facilitate timely discharges to increase referral source partnerships, reduce re-admissions, and provide an economical bundled solution to optimize revenue opportunities for your facility.

Clinical Advantage

Negative pressure wound therapy (NPWT) is used to heal a wide variety of complex wounds. RestorixHealth provides clinical oversight, managing NPWT utilization to increase outcomes and reduce costs. MasVida Health will act as the distributor and supplier of the NPWT pumps.

Community Advantage

NPWT systems allow patients to be discharged from the hospital with the NPWT pump, strengthening the partnership with referral relationships. The patient and their families are more comfortable, enhancing community value and patient quality of life.

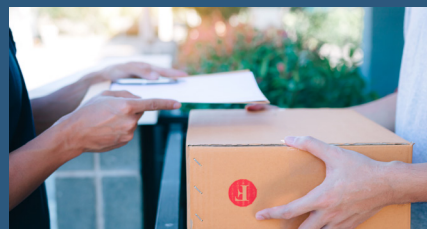

Economic Advantage

Our partnership offers a bundled flat fee or PPD rate. The enhanced clinical support and training reduces consumable waste, streamlines dressing changes to decrease labor cost, and with additional support coupled with the dedicated NPWT portal, reduces utilization days.

Better Solution. Faster Delivery. Improved Outcomes.

Simple. Transparent. Easy.
Bundled solution for one
low rate.

Order supplies as needed.
Typically, shipped same day.

**Faster healing. Better
outcomes.**
