

Facility Hygiene: Infection Prevention

Infection Prevention (MViP)

Better coverage. Healthier spaces.

We provide a comprehensive, customized infection prevention program to reduce the risk of contamination and transmission of germs in your facility. Complete coverage for your facility is achieved through a floor to ceiling program. From hand hygiene, proportioning system, floor care system, odor elimination, to electrostatic disinfection we provide a OneSource solution-bundled together for massive cost savings.

Why Choose MasVida for Your Infection Prevention?

Consolidation and savings

The biggest advantage of our MViP bundle is the money you'll save. Paying for each service individually can add up quickly. Typically, purchasing a single, standalone service will cost nearly as much as a bundle that offers more solutions.

Convenience & simplicity

Paying several individual vendors each month is time-consuming and a hassle. When you have services from multiple vendors, they'll each need a monthly check. With an MViP bundle, there's just one payment to make for all your services. Also, if you want to upgrade your bundled options, need technical support or training, or are planning to add additional service locations, you make one call to one provider to have the issues resolved.

Exclusive healthcare products

MasVida is the exclusive provider of Altra hygiene products specifically for healthcare. Altra is only available as a component of our MViP bundled offerings.

Online infection prevention certification course.
