

# EX7000 & Altra Tablets Post-Acute Usage Guide

## EX7000 - Electrostatic Backpack Sprayer

1. EMist recommends the use of disinfecting products on EPA's Disinfection List N that are approved for electrostatic application.
2. Begin at the farthest point from the doorway, work back toward the doorway so you can step out when application is complete.
3. Aim applicator wand 24"-36" (optimal distance) from the surface target area, begin with a smooth figure "S" movement aiming below at, and above the surface target area while walking at an average pace (continuously moving).
4. Make sure you are working in a methodical "S" pattern and let your passes overlap when moving to the next surface target area.
5. Allow treated area to sit for contact time as recommended by the chemical manufacturer's label before re-entry into the area.

The system is designed to minimize maintenance and cleaning. Clear the system at least once a day by spraying clean water through the system for at least 1-2 minutes.

Some chemicals are harsher or more volatile than others. Because corrosion caused by chemicals is not covered under Manufacturer's limited warranty, it is imperative that you properly flush the system as directed herein. Note that the use of some chemicals may require more frequent flushing of the system based on the chemicals corrosive nature. Signs of failing to properly flush the system include clogged nozzle, hardened or calcified hoses or lines, deterioration of the plastics such as the manifold, and/or clogged filters.

- Keep batteries charged.
- Inspect cord for cuts, tears, or damage.
- Inspect applicator for debris or damage.

## Altra Disinfecting Tablets

Altra Effervescent Tablet Solution Instructions for Use.

Follow specific directions for use and dilution chart when preparing solution. Prepare a fresh solution Daily. Prepare solution strength as required, refer to the dilution chart for correct dose, usage, and contact times for the prepared solution. (Refer to chart below)
